

Korea MOLIT AX Sprint R&D Consortium

Participation as Joint R&D & International Standardization Partner

Consortium Formation & Application Stage

1 Overview of Cooperation

Cooperation Title	R&D consortium cooperation for AI & Digital Twin-based building energy solution pilot and commercialization
Target Program	Republic of Korea MOLIT — "AI-Applied Product Rapid Commercialization Program (Land & Transport)" — Type 2 Build-up Track (Consortium Formation & Application Stage; selection result pending)
Lead / Participants	Lead — Domestic SW & Digital Twin company / Participants — Sungkyunkwan University IACF, Domestic engineering firm
Demand Companies (LOI)	Domestic "S" (Global electronics, 2026.04.17) · Flakt Group (Herne, Germany, 2026.04.16) · Ocean Engineering (2026.04.17)
Pilot Sites	Domestic — SKKU Natural Sciences Campus IACF Building (Suwon) / Overseas — Spire Tower, Warsaw, Poland (49F, 220m)
Mossland's Role	Joint R&D & International Standardization Partner — (1) Joint research on Physical AI & autonomous governance, (2) Co-contribution to IEEE 2888 Working Group international standards

2 Pilot Sites · Demand Companies

DOMESTIC · KOREA SKKU Industry-Academia Cooperation Center (Suwon) Size19,669m² GFA · 7F above / 1F below Systems32+341 EHP units · NGSI-LD based RegulationsZEB · Green Bldg · IPMVP Option-C	OVERSEAS · POLAND Spire Tower, Warsaw (Warszawa) Size49F above / 5F below · 220m TenantsGlobal tenants (incl. Domestic "S" Poland R&D) RegulationsEU EPBD · Fit for 55 · IPMVP-C
--	---

Domestic "S" (Global electronics) — LOI 2026.04.17 · **Planned review of adoption at ~30 global labs & plants (2027~2030)**
Flakt Group (Herne, Germany) — LOI 2026.04.16 · Review for 8 EU countries (2026.12~2029) · Large industrial & OEM customer network
Ocean Engineering (Korea) — LOI 2026.04.17 · **Access to major domestic electronics & engineering group affiliate network**

3 Global Expansion Alignment

- Phase 1 (2027) — Poland-EU:** Spire Tower deployment → Flakt · "S" Poland R&D linkage
- Phase 2 (2028~29) — DE-NL:** EU market entry · transfer-learning expansion
- Phase 3 (2030+) — UK-CE:** EU Renovation Wave rollout

Policy Context: EU EPBD revision & RePowerEU mandate upgraded ratings for non-residential buildings by 2030 · leveraging Korea-Poland intergovernmental cooperation framework.

** This roadmap reflects the consortium's business-plan schedule and may change depending on government project selection and execution outcomes.*

4 Mossland's Cooperation Scope

Joint R&D	Physical AI · sensor data reliability & verification
Joint R&D	Autonomous governance · AI agent decision-making · auditability
Joint R&D	Joint participation in open-data · open-source ecosystem
Standards	Co-contribution to IEEE 2888 Physical AI · autonomous governance items
Standards	Joint attendance at IEEE 2888 WG meetings · technical exchange

5 Expected Outcomes

** These expected outcomes assume final government project selection and execution; selection and performance are not guaranteed.*

- Mossland R&D activities formally linked to a Korean government R&D project and the IEEE 2888 international standards track
 - Enhanced international visibility of Mossland's open-data · open-source R&D ecosystem activities
- Expanded Korean · Asian contribution share within the IEEE 2888 WG on Physical AI · autonomous governance
 - Foundation for long-term joint research & international standardization cooperation with a Korean R&D consortium

6 Legal Notice & Disclaimer

1) Cooperation Form: This is a non-compensatory, non-equity R&D arrangement. No transfer of government grant or matching funds occurs. Mossland Foundation and the consortium lead are independent legal entities with no equity relationship. 2) Nature of the Disclosure: This disclosure provides information on the fact of R&D cooperation participation and does not guarantee any direct causal link to Mossland Foundation's revenue or to the market value of MossCoin (MOC). It is not intended as investment solicitation or advice. 3) Project Stage Notice (Application / Selection / Execution): This disclosure concerns the consortium's application (proposal) stage participation in the Korea MOLIT AX Sprint R&D public notice and does not concern government project selection or project execution. The cooperation is based on facts of the consortium formation stage; the R&D cooperation between the parties continues independently of the final government selection outcome.	4) Use of Third-Party Names & LOIs: The demand companies and pilot sites named in this disclosure are based on the business plan and LOIs and do not imply any direct transaction or agreement between the Foundation and such third parties. Some company names are shown as initials or generic terms per brand-protection convention; consortium details are available in MOLIT Public Notice No. 2026-375. LOIs are non-binding expressions of interest and do not guarantee final purchase or contract. 5) Future Schedule: Specific progress (joint research sessions, IEEE 2888 contribution items, etc.) will be announced separately via the Foundation's official channels (moss.land, medium.com/mossland-blog, github.com/mossland).
