

Korea MOLIT AX Sprint R&D Consortium — Project Selection & Agreement Execution

Follow-up to MOSS-DISC-2026-0421 (April 21, 2026)

Selection & Agreement Stage

Non-compensatory · Non-equity: unchanged

1 Summary of This Follow-up Disclosure

- On **June 25, 2026**, the Republic of Korea's Ministry of Land, Infrastructure and Transport (MOLIT) announced the final selection results of **its own call** under the AX Sprint program (26 projects in total). The project of the consortium in which the Foundation participates as a **Joint R&D and International Standardization Partner** is among them.
- The **agreement for that project was executed on July 10, 2026** — between the government side and the consortium lead. The Foundation is not a recipient of funds under it.
- The **non-compensatory, non-equity terms stated in the April 21 disclosure remain unchanged. No government grant or matching funds are transferred to the Mossland Foundation, and the Foundation receives no monetary amount in connection with this project.**
- In §6-5, the April 21 filing undertook to announce specific progress separately via official channels, and the selection and the execution of the agreement fall within that. **This disclosure is that announcement.** The dates of the announcement, the agreement and this publication are set out in **§5 of this disclosure.**

2 Selection and Agreement Facts (based on public sources)

Program	"AI-Applied Product Rapid Commercialization Program (AX-Sprint)" — the MOLIT-administered call within a program jointly promoted by 11 ministries
Call Period	March 19 - April 20, 2026 (MOLIT Public Notice No. 2026-375) — two fields: Land & Transport / Road & Mobility
Applications	147 projects submitted in total (Land & Transport 82 · Road & Mobility 65)
Announcement	June 25, 2026 (announced by MOLIT)
Projects Selected	26 projects in total = 14 in Land & Transport + 12 in Road & Mobility
Foundation's Project	Land & Transport field · Type 2 Build-up Track — one of the 26 selected projects
Agreement Executed	July 10, 2026 — the project agreement was executed between the government side and the consortium lead. MOLIT had stated that selected projects would commence following execution of agreements. The Mossland Foundation participates on non-compensatory, non-equity terms and is not a recipient of government funds.
Foundation's Standing	Joint R&D and International Standardization Partner of the consortium (not the lead institution) — unchanged from the April 21 disclosure

* Program overview, selection figures and track allocations are based on MOLIT's announcement and public reporting citing it. Names of the consortium lead and its products are withheld at the same level of anonymization as the April 21 disclosure; consortium details are available in MOLIT Public Notice No. 2026-375.

3 Understanding the Funding Figure — "KRW 75 billion" is not an amount received by the Foundation

ENTIRE MOLIT CALL · 26 PROJECTS · 2 YEARS KRW 75.0bn Total government support over two years for all 26 projects MOLIT selected. Agile Track: 16 projects / KRW 60.0bn. Build-up Track: 10 projects / KRW 15.0bn.	TRACK OF THE FOUNDATION'S CONSORTIUM KRW 15.0bn Total allocated across the 10 Build-up Track projects over 2026-2027. Per-project allocations have not been made public.	TRANSFERRED TO MOSSLAND FOUNDATION KRW 0 The Foundation participates on non-compensatory, non-equity terms; no government grant or matching funds are transferred to it.
--	---	---

- Project budgets are **disbursed to the consortium's lead and participating institutions under government R&D accounting procedures**; the Mossland Foundation is not a recipient.
- Accordingly, this selection and the execution of the agreement **produce no direct change in the Foundation's revenue, earnings or cash flow.**
- This disclosure does not guarantee any direct causal link to the market value of MossCoin (MOC) and is not intended as investment solicitation or advice.

4 Foundation's Standing and Role — Changes relative to the April 21 disclosure

Cooperation Form	Unchanged — non-compensatory, non-equity R&D arrangement. The Foundation and the consortium lead remain independent legal entities with no equity relationship.
Foundation's Role	Unchanged — (1) joint research on Physical AI and sensor data reliability/verification, (2) R&D on autonomous governance, AI agent decision-making and auditability, (3) joint participation in the open-data / open-source ecosystem, (4) co-contribution to IEEE 2888 Working Group standards and attendance at its regular meetings
Project Stage	Changed — the April 21 disclosure concerned the <i>application (proposal) stage</i> ; this disclosure concerns the <i>selection and agreement-execution stage</i> . Project execution, commercialization and outcomes have not yet begun.
Deliverables · IP	Ownership follows the consortium agreement. Development activity in the Foundation's GitHub organization (commit counts, etc.) is an activity indicator only and does not denote asset ownership or revenue.
Pilot Sites · Demand Companies	As to the domestic (Suwon) and overseas (Warsaw, Poland) pilot sites and the demand companies that submitted LOIs, as described in the April 21 disclosure, the Foundation has identified no change as of the date of this disclosure . LOIs are non-binding expressions of interest; progress such as the commencement of pilots will be announced separately.

5 Chronology

2026-06-25	MOLIT announced the selection results
2026-07-10	Project agreement executed between the government side and the consortium lead
2026-08-04	Publication of this disclosure

The Foundation publishes this disclosure having confirmed MOLIT's announcement (June 25) and the subsequent execution of the project agreement (July 10). §6-5 of the April 21 filing undertook to announce specific progress separately via official channels but set no publication deadline; this disclosure is that announcement. Later stage transitions, such as the commencement of pilots, will be announced on the same basis (§6-6 of this disclosure).

6 Legal Notice & Disclaimer

1) Cooperation Form (unchanged): This is a non-compensatory, non-equity R&D arrangement. No transfer of government grants or matching funds to the Foundation occurs. The Mossland Foundation and the consortium lead are independent legal entities with no equity relationship. 2) Nature of the Disclosure: This disclosure provides information on the selection and agreement execution of an R&D cooperation project. It does not guarantee any direct causal link to the Foundation's revenue or to the market value of MossCoin (MOC), and is not intended as investment solicitation or advice. 3) Project Stage Notice: This disclosure concerns the selection and agreement-execution stage and does not guarantee project outcomes, commercialization or the generation of revenue. It is distinct from the April 21 disclosure, which concerned the application (proposal) stage. 4) Source and Limits of Financial Figures: The KRW 75.0bn total and the per-track allocations are figures for MOLIT's entire call, based on its announcement and public reporting citing it. Confirmed budgets and disbursement records for individual projects are not information the Foundation is in a position to publish. In no case is any amount transferred to the Foundation.	5) Use of Third-Party Names & LOIs (unchanged): The demand companies and pilot sites named in the April 21 disclosure are based on the business plan and LOIs, and do not imply any direct transaction or agreement between the Foundation and such third parties. Some company names are shown as initials or generic terms for brand-protection convention. LOIs are non-binding expressions of interest and do not guarantee a final purchase or contract. 6) Future Schedule: Material stage transitions, such as the commencement of pilots and IEEE 2888 contribution items, will be announced separately via the Foundation's official channels (moss.land, medium.com/mossland-blog, github.com/mossland). 7) Forward-Looking Statements: Statements in this disclosure regarding future schedules and plans reflect judgments as of the date of writing and may change with project execution, external conditions and regulatory developments.
